

TCCC - CLS

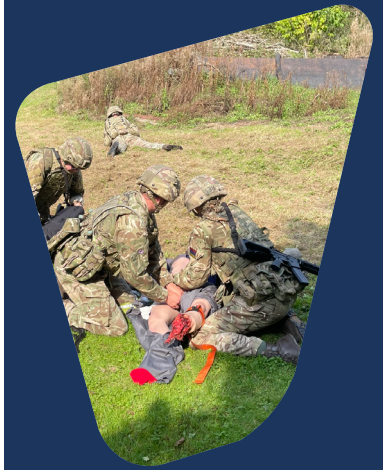

Tactical Combat Casualty Care - Combat Lifesaver

NAEMT Registered Provider

Duration: 5-Days

Group bookings available

Validity: 4 Years

What is TCCC Combat Life Saver (CLS)?

Designed for non-medical personnel, this intensive 5-day course provides practical, scenario-based training aligned with the latest military medical protocols.

Whether you're part of the armed forces, security services, or work in austere environments, this course will arm you with the critical skills necessary to intervene and preserve life when minutes matter.

What does TCCC Cover?

By the end of the course, participants will be able to:

- **Identify and manage life-threatening injuries** in combat or tactical situations, including massive haemorrhage, airway obstruction, respiratory distress, and hypothermia.
- **Apply tourniquets, haemostatic agents, and wound dressings** to control bleeding in real-world scenarios.
- **Perform effective airway management techniques**, including the use of nasopharyngeal airways and recovery positions.
- **Initiate needle chest decompression** for the management of tension pneumothorax in a tactical setting.
- **Utilise the MARCH algorithm** to guide assessment and treatment decisions.
- **Understand tactical evacuation principles**, preparing patients for transport under fire.
- **Perform casualty care under fire** and in tactical field care environments, balancing medical priorities with situational awareness.

Who Should Attend?

This course is ideal for anyone operating in high-risk environments, including:

- Military personnel and reservists
- Law enforcement officers
- Private security contractors
- Emergency responders in austere or hostile environments
- Humanitarian workers and journalists in conflict zones

Practical

We put great emphasis on the practical application of the skills and drills, creating true-to-life medical simulations

Expert

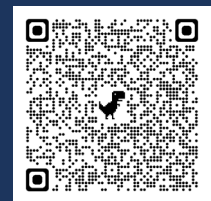

All our instructors are Military medics with real-life experience of delivering casualty care in combat environments.

Award-Winning

Train with award-winning medical equipment, as used by Armed Forces globally

Life-like

Experience as close to genuine patient trauma care as possible with hyper-realistic manikins

TCCC Combat Lifesaver (CLS) Continued

Entry Criteria

TCCC is tailored to individuals with a tactical background and basic understanding of firearm safety. Prometheus also offer TECC Tactical Emergency Casualty Care for those working in hostile environments without the required pre-requisites.

TCCC Skills Framework

TCCC is developed by the U.S. Department of Defence, Defence Health Agency (DHA) Joint Trauma System to teach evidence-based, life-saving techniques and strategies for providing the best trauma care on the battlefield. Prometheus Medical is a part of NAEMT affiliate faculty that conducts these courses. TCCC is recognised worldwide and is the gold standard for the tactical environment.

How Long is TCCC Valid for?

TCCC certificate is valid for 4 years.

What You Will Gain

TCCC will enable students to gain

- Confidence in handling combat trauma situations
- Practical, life-saving skills applicable in real-world, high-stress environments
- An internationally recognised certification from NAEMT
- Knowledge that could make the difference between life and death for your team

Why Choose Prometheus Medical International?

At Prometheus, we don't just teach; we inspire excellence. Our expert instructors bring years of frontline experience, ensuring that what you learn in the classroom directly translates into life-saving actions on the ground. With small group sizes, we offer a hands-on, interactive experience, providing personalised feedback to ensure each delegate masters the core techniques.

Testimonial

"TCCC equipped me with essential hands-on experience. The expert instructors and realistic simulations have given me the confidence and skills to effectively respond to critical situations."
