

TECC

Tactical Emergency Casualty Care

NAEMT Registered Provider

Duration: 2-Days

Group bookings available

Validity: 4 Years

What is TECC?

The NAEMT Tactical Emergency Casualty Care (TECC) Course is designed for emergency responders operating in civilian high-threat environments, including active shooter incidents, terrorist attacks, and other high-risk situations. This course provides advanced trauma care skills tailored for civilian first responders who may encounter tactical environments.

TECC incorporates evidence-based practices derived from military Tactical Combat Casualty Care (TCCC) but is adapted for the unique challenges and scenarios faced in civilian settings. With an emphasis on rapid assessment, effective intervention, and casualty care under high-stress conditions.

What does TECC Cover?

The TECC course addresses the full spectrum of tactical emergency care needs. By the end of the course, participants will be able to:

- **Apply the MARCH algorithm** (Massive Haemorrhage, Airway, Respiration, Circulation, Head Injury/Hypothermia) in assessing and prioritising care in tactical environments.
- **Control severe haemorrhage** using tourniquets, haemostatic agents, and wound packing, providing immediate care to stop life-threatening bleeding.
- **Perform effective airway management** with basic and advanced techniques, ensuring casualty ventilation in high-stress situations.
- **Respond to thoracic trauma with techniques** such as needle decompression to treat tension pneumothorax, a common risk in high-threat scenarios.
- **Provide care under fire and in other high-threat environments**, balancing medical intervention with responder and casualty safety.
- **Manage triage and patient extraction**, understanding best practices for moving casualties to safe zones or medical transport.
- **Adapt medical care based on the tactical setting**, making decisions that take into account both medical priorities and situational awareness.

Testimonial

"Great teachers, very knowledgeable & excellent facilities providing amazing simulation equipment, making lessons more realistic "

Immersive

We put great emphasis on the "hands-on" aspects of course creating true-to-life medical simulations

Expert

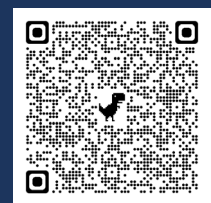

All our instructors are practising medics with the most up-to-date medical knowledge

Award-Winning

Train with award-winning medical equipment, as used by Ambulance Services and Armed Forces globally

Life-like

Experience as close to genuine patient trauma care as possible with hyper-realistic manikins

Tactical Emergency Casualty Care (TECC) Continued

Who Should Attend?

This course is ideal for professionals who may encounter civilian tactical or high-threat environments in the course of their work, including:

- Paramedics and emergency medical technicians (EMTs)
- Law enforcement officers and tactical response teams
- Firefighters and fire service medical responders
- Security and protection personnel working in high-risk settings
- Event medical staff operating in large, high-profile venues

Entry Criteria

TECC is available to those with current FREC4 certification PHEM level E.

TECC Skills Framework

TECC is developed by the U.S. Department of Defence, Defence Health Agency (DHA) Joint Trauma System to teach evidence-based, life-saving techniques and strategies for providing the best trauma care on the battlefield. Prometheus Medical is a part of NAEMT affiliate faculty that conducts these courses.

How Long is TECC Valid for?

TECC certificate is valid for 4 years.

What You Will Gain

TECC will enable students to gain

- A comprehensive understanding of tactical trauma care skills tailored for civilian emergencies
- Confidence to operate in high-threat situations, ensuring both personal and casualty safety
- The skills to make rapid, life-saving decisions in unpredictable and high-stress environments
- Knowledge that enhances both individual and team readiness for high-risk operations

Why Choose Prometheus Medical International?

Prometheus Medical International is a leading provider of emergency and trauma care training in the UK, recognised for excellence in pre-hospital care education. Our experienced instructors bring operational knowledge from high-threat and civilian emergency response environments, providing practical, scenario-based training that ensures TECC participants leave with both the skills and confidence to act effectively.
